

Sigma's World™

new line of educational games from Games by BRIGHT of Sweden

We get so many requests on games for our younger friends; fun games that also help develop the young minds of the players, and of course we listen.

So, we and our sweet little monkey Sigma are now happy to launch a line we call **Sigma's world™!**

The games in **Sigma's World™** are Play & Learn games; learn while having lots of fun! With our background in developing STEM teaching products since 2005, and making strategy games, we infuse education in play in a fun and inspiring way

*Play, learn and have fun
with the sweet and inquisitive
monkey Sigma*

Our **Sigma's World™** games let families play and spend quality time together, while the kids' minds are absorbing what's to learn in playing our games.

4 bananas™ and Race to 10™ are available today, and lots of new games are waiting to be launched in our Sigma's World™ line
